

RunTru Product Feed

Step 1: Sign Up

Go to:

<https://products.runtruhvac.com/guide-admin/>

Create a username, add your email address and desired password.

Click "Sign Up"

An email will be sent to the email address provided

The screenshot shows the RunTru Sign Up page. At the top is the RunTru logo. Below it is the heading "Sign Up". There are three input fields: "Username", "Email address", and "Password". At the bottom, there are two buttons: a red "SIGN UP" button and a grey "SIGN IN" button.

The screenshot shows the RunTru Sign In page. At the top is the RunTru logo. Below it is the heading "Sign In". There are two input fields: "Email address" and "Password". At the bottom, there are two buttons: a red "SIGN IN" button and a grey "SIGN UP" button. Below the buttons is a link that says "Lost your Password?".

Step 2: Activate & Sign In

Activate your account by clicking the "Click here to activate" link in the Email Registration Confirmation.

Enter email address and password associated with the newly created account

Step 3: Remove undesired products & Share HTML iFrame Embed Code

Check product categories and/or products that **YOU DO NOT WANT** to appear in your personalized product feed.

Click Submit to save your changes.

Click the blue "Click here to view changes" to view changes to your personalized product feed.

Once complete, copy the HTML iFrame Embed code and provide that to the account manager.

The screenshot shows the RunTru account manager interface. At the top left is the RunTru logo. At the top right are links for "DOCUMENTATION" and "LOGOUT". The main content area is titled "iFrame Embed Code". It contains instructions: "Select and copy the iFrame html code shown at right. Paste the code into an html container on your website and the RunTru embeddable product guide will display within the iFrame." Below this is an "Important" note: "The 'div' ('product-site') holding the iFrame should have its height set in CSS (or use jQuery to equal the height of an adjacent column) for a height of at least 650px or greater. The minimum 'div' iFrame container width should be at least 480px or greater." Another note says: "Additional styling may be necessary to achieve the desired results. Click here to download additional styles that can be used to configure the iFrame." A final "Important" note says: "Please click on the 'Documentation' link in the upper right for instructions on configuring the categories/products." In the center, there is a code block with the following HTML code:

```
<div id="product-site" style="-webkit-overflow-scrolling: touch; overf: <br><iframe src="https://products.runtruhvac.com/?channel_id=88" frameborder= <br></div>
```

 A red box highlights this code block. To the right of the code block is a grey button labeled "HTML iFrame Embed Code". Below the code block is a horizontal scrollbar. At the bottom, there is a note: "Once the iFrame code is embedded in your site it will not be necessary to re-embed the code each time you make changes to this product configuration page."
